

Rounding Change To the Dollar

1. Cut apart number line and assemble to create one long number line. See picture below,
** Please note there are 2 versions of the number line available. Version one has amounts 50¢ and above in orange to make it easier for beginning rounders to know to round amounts 50¢ and over to \$1.00
Version two has all amounts the same color.
2. Cut out rounding cards and control card. (2 sets available)
3. You will also need enough change to cover the amounts on the cent cards provided (\$10.50)
It's best to offer beginners nickels and dimes for easier counting (as long as they can count by 5s and 10s)
Later, quarters can be added for a variation.
4. Place number line in the middle of the workspace.
5. Place change to the right of the workspace in a pile.
6. Place rounding heading cards to the side of the number line. Create two columns as shown in the picture.
7. Place cent cards in a pile to the side of the rounding column heading cards.
8. Pick up cent card and then find the amount on the number line. Place the amount in change above the correct label (see picture below).
9. Determine whether the amount is closest to 0¢ or \$1.00. After deciding, place the cent card in the proper column.
10. Continue until all cards have been placed under the rounding heading cards.
11. Check with control card.

** note, number line can be used initially to practice counting amounts with coins. Child can either lay out amounts from left to right, or pick a card and lay out amount on card on correct place on number line.

round to 0¢	round to \$1.00
5¢	65¢
15¢	75¢
10¢	80¢
45¢	50¢
25¢	90¢

round to 0¢	round to \$1.00
20¢	55¢
35¢	60¢
40¢	70¢
45¢	85¢
30¢	95¢

round to 0¢	round to \$1.00
5¢	65¢
15¢	75¢
10¢	80¢
45¢	50¢
25¢	90¢

round to 0¢	round to \$1.00
20¢	55¢
35¢	60¢
40¢	70¢
